

Contractor e-force

on-demand work order system

WORKFLOWTEK

About Us

Welcome to Contractor e-force, a product of WorkflowTek.

WorkflowTek is a privately held corporation in West Palm Beach, Florida, specializing in software programs for companies that hire contractors as part of their workforce. The company was founded in 1998 to perform consulting work and program development for local companies. Over the years, the management team recognized a need among companies who deal with contract companies for a standardized invoicing system to efficiently process and pay contractors for work performed. Out of that need grew Contractor e-force.

The team at WorkflowTek is a dedicated group of people who want to make your life easier and give you the opportunity to make informed decisions based on real-time data. When you purchase the license for the Contractor e-force program, we'll work closely with you on installation, customization and training. We also provide phone and web-based customer support to all our clients for any technical or end-user queries on a 24/7/365-basis.

Let us give you a demonstration of this new product that will ease your worries, put you in complete control and, most important, save you time and money.

What is Contractor e-force?

Contractor e-force (Cef) is a software program used to manage work orders assigned to contract crews. It is so flexible that it can accommodate any type of rate structure, any type of contracted work, any number of users and any type of industry. Once the program is customized for your particular needs, you will enjoy the most efficient way to order the work, track it, produce and analyze reports and link with your accounting system.

With Contractor e-force...

As you get more familiar with Cef, you'll realize countless advantages to utilizing this program, especially improved quality of performance by your contractors and cost-savings to your company.

Make informed decisions about selecting the best contractor

Because you will be able to generate reports that allow you to compare costs, extra work, performance and quality of work among contractors, you will make smart choices.

Real-time data keeps you informed about jobs at all times

Cef gives you up-to-minute status of all contracted jobs including how much you've paid contractors and how much you've committed to pay. You will know daily if your contractor field supervisors and accounts payable clerks are handling their schedules and responsibilities in a timely manner.

Consolidation and standardization mean profitability

Cef gives you the tools to consolidate your contractor payment process into a centralized location and to standardize the work and invoicing process, meaning your employees and contracted labor force work more efficiently.

...the benefits are almost limitless.

Benefits to contractors can translate into cost savings for you

Cef makes the invoicing and communication process more efficient for your contractors too, which should mean reduced rates charged to you.

You're in complete control

Avoid surprises by relying on Cef's system for pre-approval and final approval of all extra work and costs. Cef is also designed to ensure that necessary job actions and processes do not go astray or get misplaced as it will automatically generate reminder emails to responsible persons throughout the job.

No worries about safety and security

Cef, which meets Sarbanes-Oxley requirements, is a secure system that is easily maintained by an administrator who can grant access to only those who need it.

Choose an internal or external solution

WorkflowTek can install and configure Cef on to your server, or select our web-based hosted solution located in a secure world-class data center.

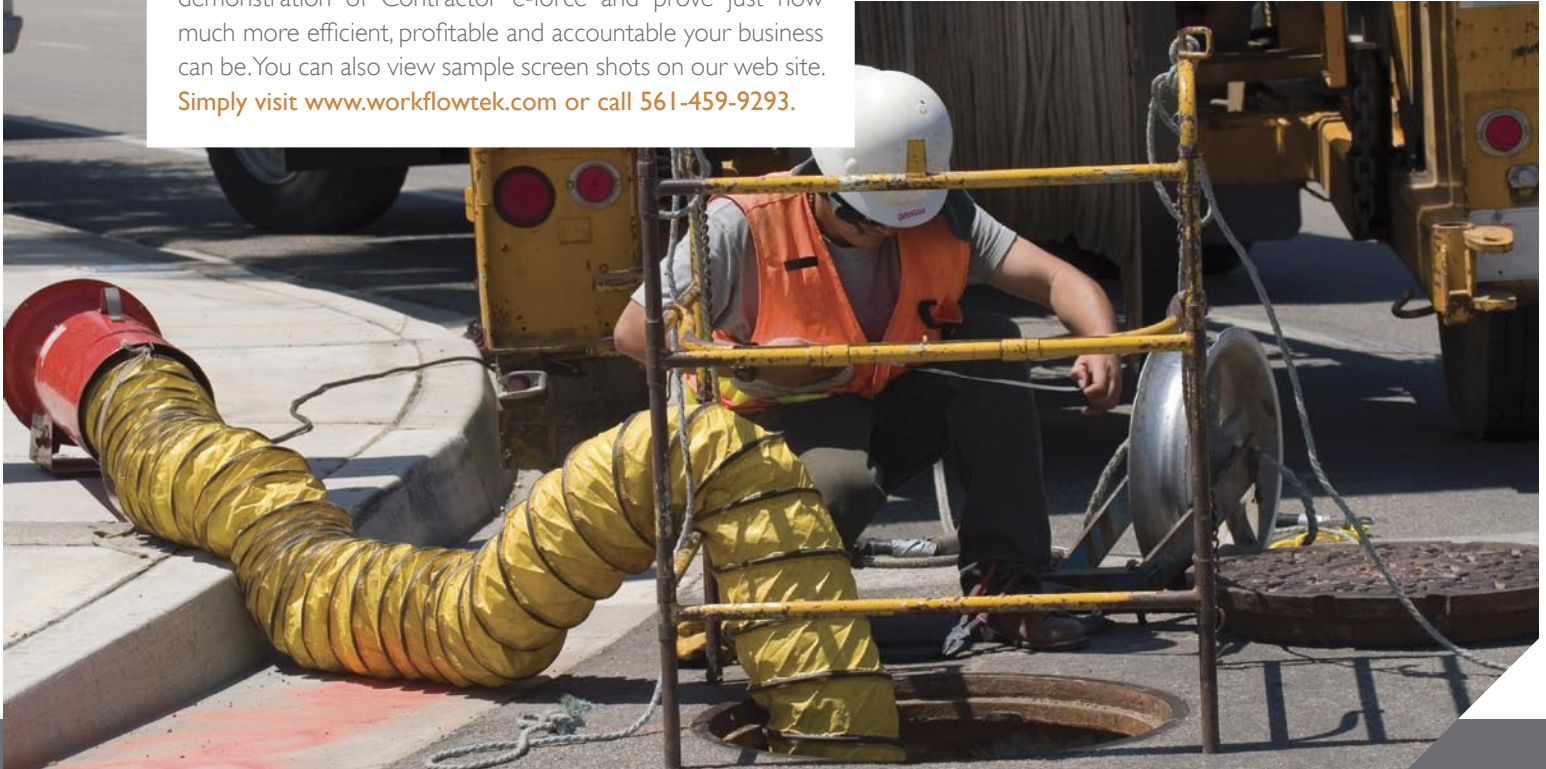

Who Needs Contractor e-force?

Any company or organization that wants to standardize the work flow process, centralize operations, analyze costs and quality of contracted work and save money will benefit from Cef. And if you are currently using a paper process, Cef will convert you into an electronic process quickly, efficiently and within a reasonable cost that allows you to realize a fast return on your investment.

Seeing is Believing.

Let the team at WorkflowTek give you a free, on-site demonstration of Contractor e-force and prove just how much more efficient, profitable and accountable your business can be. You can also view sample screen shots on our web site. Simply visit www.workflowtek.com or call 561-459-9293.
